the savings.*

**Low-cost single-diode
replacement for incandescent lamps!**

	BULK	POLYPACK	DESCRIPTION
	STL008RB	STL008RBP	Stud mount, hard wired, passenger side
	STL009RB	STL009RBP	Stud mount, hard wired, driver side

	BULK	POLYPACK	DESCRIPTION
	STL0016RB	STL0016RBP	Universal mount, hard wired, passenger side
	STL0017RB	STL0017RBP	Universal mount, hard wired, driver side

	BULK	POLYPACK	DESCRIPTION
	RVSTL0060	RVSTL0060P	Hard wired, passenger side, white base
	RVSTL0061	RVSTL0061P	Hard wired, driver side, white base
	RVSTLB0060	RVSTLB0060P	Hard wired, passenger side, black base
	RVSTLB0061	RVSTLB0061P	Hard wired, driver side, black base

**That's 100,000
service hours
compared to
just 2,000.**

ONE™
LED LAMPS
by **optronics®**

The end of incandescent lighting.

Incandescent lamps burn out, are fragile, have glass components, use filaments. They cause traffic violations, CSA fines, vehicle downtime, and logistical nightmares, and because they are slower to light they add a car length of stopping distance at 65 mph. In the 21st century a cheap incandescent lamp can cost you big bucks. At just half the cost of other LED lamps, the ONE Series puts LED technology within everyone's reach.

ONE Series LED lamps meet all FMVSS 108 photometric requirements, come with a lifetime warranty, use standard electrical connectors and are made of sonically welded polycarbonate. The lamps use solid-state surface mount device (SMD) design that protects their electronics against moisture, shock and vibration.

With ONE Series LED lamps you get the best – the best product, the best performance, the best price, and ultimately the best value.
