MONOBLOC
CARBIDE TIP

PERFECT HOLES

The 120° angle allows for perfectly straight drilled holes ($3 \times 120^\circ = 360$).

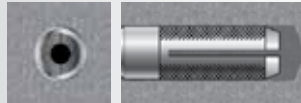

3 simultaneous contact points enables equal performance levels.

DRILLS WITHOUT CRACKING THE CONCRETE

The Pro-Impact Plus carbide tip achieves clean and perfect holes with its 135° angle without cracking the concrete when it drills close to an edge.

OPTIMUM ANCHORING

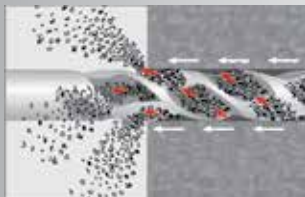

Meets the requirements of the european standards of anchoring (ATE)

SQUARE FLUTE DESIGN

STRENGTHENED
BODY

DUST REMOVAL

The square flute design, combines a high pressure channel with a low pressure chamber, enabling better dust removal. Its strengthened body reduces vibration during drilling.

THERMAL TREATMENT

Heat treated under controlled atmosphere. The optimized geometry provides a hardened profile which provides full hammering effect and power to the drill.

HAMMERING POWER

REINFORCED CONCRETE

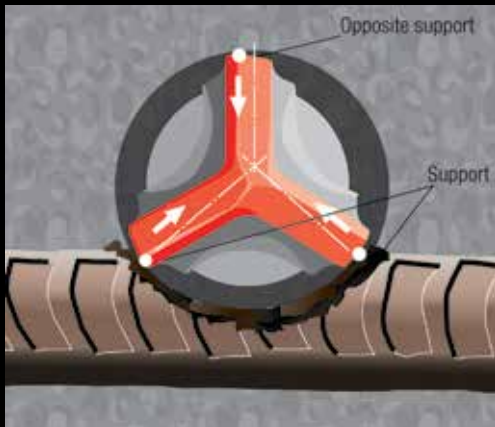

STONE CONCRETE BLOCK

PRO-IMPACT PLUS MAKES THE DIFFERENCE IN REINFORCED CONCRETE

PRO-IMPACT™ PLUS +

The patented head design flows effortlessly through concrete and rebar.

VARIOUS HEAD DESIGNS ON THE MARKET

Drill bits must be reliable in any situation no matter what the contact point is on the rebar.

SINGLE CUTTING EDGE OR FLAT SURFACE

A single cutter or flat surface tip will cause the drill bit to jam or the head tip to shear off when it hits the rebar's edge.

2 CUTTING EDGES

The flat section on the carbide tip's edge will distort the drill bit shaft along the rebar causing it to deviate and break.

4 CUTTING EDGE 2+2 GEOMETRY

Risk of blocking on the rebar and irregular wear on the drill bit's tip.
