### Safety Catalogue

### Clean & Safe™ Guarantee

### **Quality at RONCO**

Clean & Safe™

As a supplier of protective products, contributing to the safety of consumers and workers is of utmost importance to RONCO. For that reason, we have adopted the principles of the Clean & Safe™ Guarantee. From the storage of the raw material to the delivery of the product to your warehouse, RONCO is committed to maintaining the integrity and hygiene of each

of the products we offer. This Guarantee ensures that products remain sanitary throughout the manufacturing process, including the:

- Quality and storage of raw material;
- Handling and transformation at the manufacturing facility; and
- Verification and control of finished product quality

#### **Raw Material**

Close attention is paid to the consistent quality and storage of the raw material used in the manufacturing process. This stage is the first step in ensuring consistency in the quality of the finished product.

#### **Quality Control**

Product quality is verified at several stages before being released for delivery to the customers. Random quality control is done online during production.

A pre-shipment inspection then occurs. Upon receiving the items, an additional test is conducted by internal quality control on product samples in order to ensure that they meet standards and specifications.

#### **Manufacturing Facility**

This step of the Clean & Safe™ system focuses on the:

- Safety of employees;
- Hygiene of workers, particularly of those individuals in direct contact with the product;
- Cleanliness of the packaging materials; and
- Storage of the finished goods until shipment

#### The Guarantee's Benefits for You

With this Guarantee in place, you can be confident that you will receive products that:

- Are hygienic, reduce the risk of contamination;
- Offer consistent product quality; and
- Meet and exceed industry standards.

#### **Providing consistent quality products: our priority**

RONCO is a customer-focused company committed to providing consistent quality products and services to respond to industry's safety product requirements.

We are dedicated to the support and realization of our quality policies, objectives and systems. In order to achieve our goals, employee training is an important part of our corporate culture.

#### **Quality Control**

As a part of our efforts to ensure that we only deliver consistent quality products, all of our products undergo strict quality inspections, to ensure that they comply with our specifications.

- During the manufacturing process, on-line inspections are performed.
- Before products are shipped, RONCO representatives conduct a quality inspection of random samples, to ensure that products meet specifications.
- As the products are being loaded, we check to ensure that the packaging is in good condition.
- Upon arrival of the goods at our main RONCO warehouse in Canada, a further quality inspection is performed.
- For shipments made directly to our customers, our quality department coordinates (in consultation with the customer) a quality inspection by our representatives across Canada.

#### **HACCP**

In response to increased consumer demands for food safety, Canada's governments — both federal and some provincial — have developed food safety programs incorporating internationally recognized HACCP — Hazard Analysis Critical Control Points — principles to reduce the risk of cross-contamination. RONCO features a full line of disposable and reusable gloves, as well as protective gear, many offered in a variety of colours, to assist you in achieving HACCP compliance.

#### CFIA

We recognize that many of our customers in the food processing industry require "Letters of Non-Objection" from the CFIA (Canadian Food Inspection Agency). We have successfully obtained these letters for products that are used in the food processing and service industries.

#### ISO

RONCO is ISO 9001:2008 certified as well as ISO 13485:2003 certified for our medical device products. As such, our entire company is committed to providing products and services that consistently satisfy and exceed the requirements and expectations of our customers.

- We have established and will continually improve the effectiveness of our quality management system, embracing the values of our business and customers.
- We strive to work with suppliers who are also ISO 9001:2008 certified.

### **Table of Contents**

#### Past, Present and Future

Founded in 1996, RONCO Protective Products is a world class manufacturer of safety products for head, hand, and body proctection. Since its inception, RONCO has strived to meet and exceed customers' needs through commitment to manufacturing consistent quality products and providing the best service industry wide.

#### **Our Vision**

To become a leader in the supply of safety (PPE) products.

#### **Our Mission**

To provide our customers with consistent quality products to enhance user safety, confidence and productivity at competitive prices.

#### **Operations**

RONCO's head office is in Concord (north of Toronto), Ontario, Canada and its operations encompass Canada and the Far East. Sales offices all across Canada complement RONCO's presence in the Canadian market. High tech and state of the art manufacturing facilities in China and Malaysia, allow RONCO to manufacture top quality products while remaining extremely competitive. An on-site team of dedicated quality assurance inspectors and market researchers ensure that RONCO's corporate values are being enforced for human resources standards, manufacturing and quality processes.

RONCO takes pride in the quality of the people involved at all levels of its operations and ensures that its employees are satisfied with their work and have the tools they need to achieve their tasks effectively time after time. By creating more value in the workplace, RONCO is able to create more value in the marketplace.

5

RONCO features a wide range of disposable gloves; in Nitech®, synthetic material, vinyl, latex, nitrile and polyethylene.

Most of these are available as both lightly powdered and powder free gloves, with sizes ranging from X–Small to XX–Large.

RONCO provides options in disposable gloves that cater to a variety of applications across a wide range of industries including food processing, food service, beauty, industrial, light chemical and medical among others.

#### **Quality Control**

At RONCO, we believe in strict quality checks at various stages, including during production, packaging and upon arrival.

We check the gloves for various properties including the following:

PROPERTIES	DESCRIPTION
Length	
Thickness	Fingertip Palm Cuff
Physical properties	Tensile strength, before and after aging Elongation, before and after aging Maximum powder level
Major visual defects	Holes in the fingers Holes between fingers Uneven colour Coagulum > 5 mm Weakness between fingers Foreign particles/dirt/stains (Non-removable) Mixed size Excess powder No bead or not completed bead
Minor visual defects	Removable dirt Slight colour variation Small stains Coagulum < 5mm Uncharacteristic odour Blister bead
Pinholes	

RONCO's AQL (Accepted Quality Level) meets or exceeds the international standards.

AQL:
Pinholes 1.5
Major defects 2.5

Minor defects

4.0

#### **Colour Coding System**

RONCO uses an innovative size selection colour coding

system on the entire range of disposable glove dispensers to facilitate easy identification of the correct glove size. Each dispenser is colour coded on both ends as well as on the top panel making it easier to identify the right glove size.

X-Small / T petit

Small / Petit

Medium / Moyen

Large / Grand

XX-Large / TT grand

#### **HACCP Compliance**

RONCO offers a wide range of gloves in a variety of colours to assist in HACCP (Hazard Analysis and Critical Control Points) compliance. The different colours help you reduce the risk of cross-contamination at your workplace.

#### **Certifications**

For all the products used in food service and food production industry, RONCO has obtained certification from CFIA (Canadian Food Inspection Agency), that make them suitable for use in food establishments.

RONCO also has obtained medical devices licenses for its range of examination gloves.

### Industrial Gloves

#### Unsupported Gloves

Unsupported gloves are manufactured by dipping a ceramic mould directly into Natural Rubber Latex and/or Poly Vinyl Chloride (PVC), and/or Nitrile solution and other polymers. The type of polymer used and the thickness determines the level of resistance gloves have to chemicals, abrasions, and tear.

#### UNSUPPORTED **FLOCKLINED**

The inside of a flocklined glove is sprayed with cotton before drying. This type of glove provides added comfort and also absorbs excess sweat from hands.

#### **Types of Grip**

DIAMOND **EMBOSSED** 

DIAMOND RECESSED / FISH SCALE

#### **Glove Materials** - Unsupported Gloves

#### **NITRILE**

- Provides good snag, puncture, and abrasion resistance. Also provides good resistance to bases, oils, solvents, esters, grease and animal fat.
- Comes in both unlined as well as flocklined

#### LATEX

• Provides a relatively high level of flexibility and is very elastic. Some people exhibit an allergic reaction to the proteins found in natural rubber, latex gloves are not recommended for them.

UNSUPPORTED

UNLINED

An unlined glove

is subjected to a

chlorination, which

makes donning the

glove easier without

putting any powder

process called

• Comes in both unlined as well as flocklined

#### **NEOPRENE**

• Provides the widest range of chemical resistance including: Oils, alcohols, acids, inks and ketones

#### **EN388 - MECHANICAL RATING OVERVIEW**

The purpose of a mechanical rating is to inform a worker of the levels of physical protection that they can expect to get from the glove they are using. There are four mechanical threats that CE mechanical ratings addresse:

#### These are:

- 1. Abrasions: Scrapes to the hand by abrasive surfaces.
- 2. Cuts: Lacerations to the hand by sharp blades or edges.
- 3. Tears: Tears to the skin caused by a protruding ragged edge.
- 4. Punctures: Punctures caused by protruding objects such as glass, nails or splinters.

CE EN388 is the European testing standard by which gloves are tested for their resistance to these four threats.

#### SYNTHETIC REPLACEMENT FOR LEATHER GLOVES

### **Material Types**

### **Protective Apparel**

Choosing the proper protective garments is very important in ensuring worker safety. Determining which apparel is best suited for a job requires thorough knowledge of the duties to be performed as well as an assessment of the workplace to spot environmental hazards. Sound

knowledge of the industry standards can also contribute to the proper selection of the type of apparel needed. RONCO offers a wide variety of safety apparel to address common protection needs and requirements of various industries.

#### **POLYETHYLENE**

Most commonly used plastic; this is a single layer of polyethylene film providing good protection against fluids.

#### **CPE (Cast polyethylene):**

Excellent protection against liquids, oils and particulate matter

#### LDPE (Low density polyethylene):

Excellent resistance to water, moisture and most organic solvents

#### **HDPE** (high density polyethylene):

Excellent resistance against several acids, alkalis and solvents

#### **Material properties:**

Hardness: HDPE>LDPE
Strength: HDPE>LDPE
Ductility: HDPE<LDPE
Single use material

#### **POLYURETHANE**

A biodegradable material that reduces environmental impact; polyurethane provides excellent resistance against chemicals, acids, fats, oils and grease. The fabric is smooth and seamless; eliminates bacterial and dirt traps.

#### **Material properties:**

- Resistance to temperature down to -54°C / -65°F, up to 82°C / 180°F
- Excellent puncture, abrasion and tear resistance
- 100% waterproof
- Washable material; can be reused

#### **POLYPROPYLENE**

100% virgin spunbonded polypropylene; it is a single layer woven like fabric providing good protection against dry particulates and light fluids.

#### **Material properties:**

- Superior breathability
- Soft and lightweight

#### **MICROPOROUS**

Microporous material provides an effective short-term containment of contaminants in a sterile environment.

The construction is light in weight but provides comfort, strength, durability and impermeability.

It traps dirt, bacteria, spores and other airborne contaminants while allowing gasses to pass through it, making the material breathable

#### **Material properties**

- Flexible and light-weight
- Breathable
- Strong
- Low linting
- Barrier against liquids
