Examination Gloves

RONCO features a full portfolio of examination gloves: Vinyl; Latex; Nitrile and RONCO Nitech®, our exclusive glove. Most of these are available with sizes ranging from X-Small to XX-Large.

All of our examination gloves are registered with Health Canada and all have Medical Device Licenses.

The demands in the Healthcare Industry are moving towards better protection without compromising comfort. RONCO is committed to meeting the industry requirements with consistent quality products that offer excellent strength and comfort, while providing the needed protection.

Driven by innovation, RONCO has successfully introduced unique products by identifying existing gaps and developing solutions catering to specific needs.

Quality Control

At RONCO, we believe in strict quality checks at various stages, including during production, packaging and upon arrival. We check the gloves for various properties including the following:

PROPERTIES	DESCRIPTION
Length	
Thickness	Fingertip Palm Cuff
Physical properties	Tensile strength, before and after aging Elongation, before and after aging Maximum powder level
Major visual defects	Holes in the fingers Holes between fingers Uneven colour Coagulum > 5 mm Weakness between fingers Foreign particles/dirt/stains (Non-removable) Mixed size Excess powder No bead or not completed bead
Minor visual defects	Removable dirt Slight colour variation Small stains Coagulum < 5mm Uncharacteristic odour Blister bead
Pinholes	

Colour Coding System

RONCO uses an innovative size selection colour coding system on the entire range of disposable glove dispensers to facilitate easy identification of the correct glove size. Each dispenser is colour coded on both ends as well as on the top panel making it easier to identify the right glove size.

Certifications

- ISO 13485:2003
- ISO 22000:2005
- Medical Device Licenses
- CFIA (Canadian Food Inspection Agency) Letters of No Objection
- CE

RONCO NITECH®

Nitech® Examination Gloves

- A revolutionary new material unique to **RONCO**
- Characteristics:
 - **Easy Donning Technology** facilitates donning of gloves in wet, humid or sweaty conditions
 - Exceptional touch sensitivity and dexterity
 - Superior durability
 - Powder free; eliminates risks of powder contamination
 - Blue colour

RONCO innovates yet again by introducing the most advanced material technology in the market. Manufactured from special materials using nanotechnology, RONCO Nitech® is a revolutionary product that incorporates the best features of different types of disposable gloves available in the market. The glove is hypo-allergenic, reduces the risks of allergic reactions.

NEW Improved Formula

Protective Apparel

Choosing the proper protective garment is very important to ensuring worker safety. Determining which apparel is best suited for a job requires thorough knowledge of the duties to be performed as well as an assessment of the workplace to spot environmental hazards. **RONCO** offers a wide variety of safety apparel to address common protection needs and requirements of various industries.

- Aprons
- Gowns
- Safety Glasses
- Bouffant Caps
- Labcoats
- Shoe Covers
- Coveralls
- Masks
- Sleeves

RONCO protective apparel is made from premium quality material, ensuring reliability and safety for workers who depend on them to accomplish their daily activities.

Polyethylene

Most commonly used plastic; this is a single layer of polyethylene film providing good protection against fluids.

CPE (Cast polyethylene):

Excellent protection against liquids, oils and particulate matter

LDPE (Low density polyethylene):

Excellent resistance to water, moisture and most organic solvents

HDPE (High density polyethylene):

Excellent resistance against several acids, alkalis and solvents

Material properties:

- Hardness: HDPE > LDPE
- Strength: HDPE > LDPE
- Ductility: HDPE < LDPE
- Single use material

Polyurethane

A biodegradable material that reduces environmental impact; polyurethane provides excellent resistance against chemicals, acids, fats, oils and grease. The fabric is smooth and seamless; eliminates bacterial and dirt traps.

Material properties:

- Resistance to temperature down to -54°C / -65°F, up to 82°C / 180°F
- Excellent puncture, abrasion and tear resistance
- 100% waterproof
- Washable material; can be reused

Polypropylene

100% virgin spunbonded polypropylene; it is a single layer woven like fabric providing good protection against dry particulates and light fluids.

Material properties:

- Superior breathability
- Soft and lightweight

Microporous

Microporous material provides an effective short-term containment of contaminants in a clean environment.

The construction is light in weight but provides comfort, strength and durability.

It traps dirt, bacteria, spores and other airborne contaminants while allowing gases to pass through it, making the material breathable.

Material properties:

- Flexible and lightweight
- Impermeable
- Low linting
- Liquid barrier protection
- Dry particulate barrier protection

COVER ME™ Polyethylene Aprons

- Made from polyethylene
- Smooth finish
- Size: 28" x 46" 60" x 38" (PEA4)
